

## LED Panel Light

### Installation Steps

**Disconnect All Power**

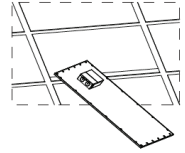

#### STEP 1

Remove ceiling tile or existing fixture where product is being installed.

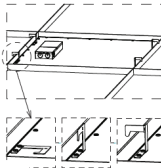

#### STEP 2

Place panel light on the T-bar to secure the panel's position in ceiling.

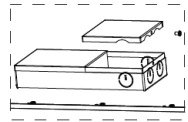

#### STEP 3

After securing, bend four tabs up and secure panel to the ceiling.

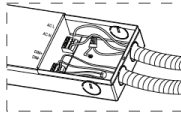

#### STEP 4

Open the driver cover.

#### STEP 5

With power off, feed power leads to driver.

#### STEP 6

Connect power leads to driver according to wiring diagram on adjacent driver plate: white to N, black to L, and green to ground.

\* for dimmable option: purple to DIM+, grey to DIM-
